Education:

VISHWAKARMA INSTITUTE OF INFORMATION TECHNOLOGY (VIIT)

B.TECH in Information Technology | Jul'23 – Jun'27

CGPA: 8.71

Work experience:

Pristine Pro Tech

AI Automation Engineer Intern

Jan 2026 – Present

Pune, Maharashtra

- Built and deployed end-to-end AI automation systems using n8n, integrating LLMs (Groq – LLaMA 3), APIs, and custom JavaScript

workflows.

- Developed a customer call analysis pipeline for transcript cleaning, summarization, sentiment analysis, and structured reporting.

- Engineered a churn prediction system and RAG-based workflows using embeddings and vector databases for contextual insights.

- Automated data pipelines with Google Sheets and Supabase; optimized workflows via modular design, batching, and error

handling.

Centre for Development of Advanced Computing (CDAC)

Data Engineering Intern (Remote)

Jun 2025 – Jan 2026

Pune, Maharashtra

- Designed an end-to-end data pipeline for large-scale face dataset creation (actors, politicians, cricketers) with automated web

scraping and structured storage.

- Built face detection, cropping, and AI-based dataset cleaning pipeline using DeepFace (FaceNet) and OpenCV similarity

techniques.

- Implemented impurity detection with threshold tuning and TRASH recovery; generated analytics reports (CSV) for accuracy and

reliability metrics.

Projects:

InstaHire – AI-Powered Job Portal | Next.js, Node.js, PostgreSQL, FastAPI

Industry Project – InstaHR Solutions

Jan 2026 – Present

- Developed a full-stack AI-based job portal with role-based dashboards (Candidate, Employer, Admin) and secure JWT

authentication.

- Built an AI Resume Screening Engine with weighted scoring: Skill Match (50%), Experience Match (30%), Keyword Relevance

(20%); enabled automated ranking and badge classification.

- Integrated Elasticsearch for job search and Redis for caching; ensured reliability via rate limiting, input validation, and secure

payment verification.

AI – Argument Cartographer | Python, LangChain, LLMs, Multi-Agent Systems

- Developed an AI system using ReAct and multi-agent architectures to extract claims, counterarguments, and evidence from news

articles.

- Achieved ~21% improvement in accuracy and 100% reliability over traditional prompting across 48 real-world articles.

SmartSpend – Personal Finance & Expense Analysis Platform

- Built a web-based financial management system with expense tracking, categorization, and identification of essential vs

non-essential spending.

- Provided data-driven insights and visual analysis with an interactive UI for managing income, expenses, and savings goals

Skills:

Automation: n8n, LangChain, RAG Pipelines, Vector Databases, Groq (LLaMA 3)

Languages: Java, C++, JavaScript, Python, SQL

Databases: PostgreSQL, MySQL, Supabase, Redis, Elasticsearch

Tools & Platforms: Git, GitHub, Postman, Google Sheets API

AI / ML: Multi-Agent Systems, DeepFace, OpenCV, Sentiment Analysis, NLP

Soft Skills: Problem Solving, Analytical Thinking, Communication, Team Collaboration.
